## Why Elementary Bible Quizzing?

The goal of elementary Bible Quiz is to get students in the word every day. We design the format, so that if a student learns a verse every day, he can learn the entire section for that year. If a student learns to study the Word every day in his youth, when he is old, he will not depart from it! We also believe that the benefits yielded from competition itself are also well learned at a young age, which helps a child's complete development. If we can encourage a student with more opportunities to study the word, then we believe that he will be more apt to develop an affinity for it and more apt to develop a reverence for the Scriptures he is learning!
